SONETO

*Sciencia e amor, humida e profunda,
cuja sombra acurtila a humanidade,
forma o homem para a terra e o povo/onda
no seu luminoso desdobramento.*

*Sciencia flameja bordado de luz profunda
que caliza o romero d'claridade;
sem deslumbrante resplender lavada,
a estrada azul da nossa realidade...*

*E serd a nossa quateria padroeira
para nos orientar a vida inteira
no vertigido amago do tempo
e falto...*

*Guardada para os gestos humanos,
para os nossos passos e sonhos
na caminhada do amor e do trabalho.*
